SUMMARY

Aspiring Data Science Intern and 3rd-year B.Tech Computer Science & Engineering student with hands-on exposure to data analysis, machine learning, and statistical techniques through academic projects and a Data Science & Machine Learning internship. Familiar with Python, data pre-processing, feature analysis, and basic model development, and motivated to apply data-driven thinking while continuously learning in a professional environment.

PROJECT

Fresh ScanX

freshscanx-frontend.onrender.com/

- Developed Fresh ScanX, an AI-based fruit freshness detection system using deep learning (CNN).
- Implemented data pre-processing, image augmentation, and class balancing to enhance model performance.
- Trained and fine-tuned models with hyperparameter optimization for accurate classification.
- Enabled real-time predictions using mobile camera capture and image upload functionality.

Smart Movie Recommendation

smart-movie-recommendation.onrender.com/

- Developed an industry-grade hybrid movie recommendation system delivering personalized user recommendations.
- Integrated collaborative filtering (user-item interaction modeling) with content-based similarity algorithms.
- Applied the MovieLens 100K dataset following a real-world recommendation system pipeline.
- Engineered an industry-grade hybrid recommendation engine by integrating collaborative filtering and content-based methods, optimizing personalized recommendations for diverse user preferences.

Sugar Sense (Diabetes Detection)

USC Hack-a-bot Event • sugar-sense.onrender.com/

- Developed a diabetes risk prediction web application using Machine Learning and PyTorch.
- Implemented data preprocessing pipelines with feature scaling and label encoding.
- Built a Flask-based REST API for real-time model inference.
- Containerized and deployed the application using Docker on Render.com for production use.

EDUCATION

B.Tech CSE 2027

KIIT University, Bhubaneswar • 8.29

C.I.S.C. in Science

Vision International School, Uttarpara Kotrung • 2023 • 83%

C.I.C.S.E in Science

Vision International School, Uttarpara Kotrung • 2021 • 89.5%

CERTIFICATIONS

Data Analytics Job Simulation

Deloitte Australia • 2025

- Performed hands-on data analysis and forensic analytics tasks.
- Gained practical exposure to data-driven decision making in a consulting environment.
- Strengthens profile for Data Analytics, Data Science, and AI/ML internships and roles.

Virtual Internship Program in Cybersecurity

Cisco Networking Academy • 2025

- Built strong awareness of data security, privacy, and governance in enterprise environments.
- Applied analytical thinking and pattern recognition to security-related problem scenarios.
- Strengthened foundation for secure data science and machine learning workflows.

INVOLVEMENT

Technical Team member & Volunteer

KIIT UNIVERSITY, Bhubaneswar IEEE Ctsoc & Cis Society • September 2025 - January 2026

- Served as Volunteer and Technical Team Member at the IEEE 23rd OITS International Conference.
- Assisted in technical coordination and research paper publication workflows.
- Contributed to conference management and academic process execution.

SKILLS

Languages : Java, Python
Core Skills : Machine Learning, Data Science, NLP, Statistics
Libraries : Pandas, NumPy, Scikit-Learn
Frameworks : Flask, FastAPI
