Education

Kalinga Institute of Industrial Technology, Bhubaneswar, Odisha	JUL 2023 – MAY 2027
B.Tech in Computer Science and Engineering CGPA: 8.31/10 No Active Backlogs	
Vision International School, CISCE Board, Uttarpara Kotrung, West Bengal	
Class XII: 86%	APR 2023
Class X: 89.8%	APR 2021

Technical & Soft Skills

Languages:	Python, Java, JavaScript, SQL
CS Fundamentals:	Data Structures & Algorithms, Object-Oriented Design, Operating Systems
Systems Design:	Distributed Systems, Scalability, Fault Tolerance, Concurrency Control
Backend & Databases:	FastAPI, REST APIs, JWT Authentication, SQLAlchemy, PostgreSQL, SQLite
Testing & DevOps:	pytest, GitHub Actions CI/CD, Docker, Prometheus, Grafana
Tools:	Git, GitHub, JIRA, Agile
Soft Skills:	Problem-Solving, Communication, Collaboration, Ownership

Work Experience

Accenture – Associate Software Engineering Intern, Bengaluru	MAY – JUL 2026
<i>Project: Specification Driven Development (SDD) in Application Management Services (AMS)</i>	
- Diagnosed 3 recurring root causes in AMS ticket workflows (requirement ambiguity, documentation gaps, traceability issues) - Built a RAG-based support chatbot via FastAPI, replacing manual L1 ticket triage - Authored Software Design Documents (SDDs) piloted across 2 delivery tracks; built a JIRA-based demo prototype and presented it to the project lead and manager	

Technical Projects

APIWatch	GitHub
<i>Python, FastAPI, SQLAlchemy, PostgreSQL, SQLite, pytest, GitHub Actions, Prometheus, Grafana</i>	
- Built a FastAPI + SQLAlchemy REST API with JWT authentication, per-user data isolation, optimistic concurrency control, and idempotent request handling for safe, reliable concurrent access - Engineered a 49-test automated suite achieving 98.63% coverage, enforced via a GitHub Actions CI pipeline that gates merges on lint (ruff/black) and a coverage threshold - Instrumented the API with Prometheus metrics and a live Grafana dashboard tracking request latency, throughput, and error rate, validated end-to-end with concurrent load testing	
Smart Policy Recommendation Engine	GitHub
<i>React, TypeScript, FastAPI, SQLAlchemy, scikit-learn, Docker, GitHub Actions</i>	
- Built a full-stack insurance policy recommendation engine (React + TypeScript, FastAPI + SQLAlchemy) that runs risk profiles through a hard-eligibility filter, rule-based scoring, and an ML pricing model for explainable recommendations - Trained a Gradient Boosting Regressor (scikit-learn) on a 1,338-row medical cost dataset, achieving 0.87 R^2 on a held-out test set, blended with the rules engine for transparent pricing - Achieved 95%+ coverage across 45 automated tests (pytest, Vitest), CI-enforced via GitHub Actions with vulnerability scanning and Docker builds	

Certifications, Achievements & Activities

- Solved 300+ DSA and SQL problems on LeetCode (60+ medium, 20+ hard)
- SOF International Mathematics Olympiad: 3 Gold Medals (2014–2016) and 2 Silver Medals (2017–2018) across five national cycles
- Basketball – XIM Open Tournament: finished top 16 among 100+ registered teams
- IEEE CTSoc & CIS Technical Volunteer – 23rd OCIT International Conference, KIIT

Accenture Summer Internship Badge and Certification

SAP Certified – SAP Fiori Application Developer
